

### **Atlantic Test Range Addition**

Request: \$9,830,000  
Naval Air Station, Patuxent River  
Patuxent River, MD

This Project will construct an addition to the existing Atlantic Test Range, which is the only Naval Test and Evaluation Range on the East Coast, to house new control rooms for Unmanned Air Vehicles, intelligence data acquisition laboratory spaces, as well as Sensitive Compartmented Information Facility areas. This is a good use of taxpayer money because this extension will provide additional support to test and evaluation of major Navy Programs such as the Joint Strike Fighter, the Unmanned Carrier Assault Vehicle and the Broad Area Maritime Surveillance platform.

### **Agile Chemical Facility**

President's Budget Request: \$34,238,000  
Naval Surface Warfare Center at Indian Head,  
Indian Head, MD

This project will replace the existing Agile Chemical Facility at Indian Head. This is a good use of taxpayer money because it replaces a nearly 70-year old, outdated facility which no longer meets current safety standards with a state of the art facility which will continue to be the Navy's sole provider of torpedo fuel.

### **BAMS Test and Evaluation Facility**

President's Budget Request: \$42,211,000  
Naval Air Station, Patuxent River  
Patuxent River, MD

This project will construct a hangar that will house Unmanned Air Vehicles and provide administrative space, communications rooms, lab spaces, and a mission control system. This is a good use of taxpayer money because this facility will directly support the Navy's Broad Area Maritime Surveillance Program which is critical to ensuring the Navy has persistent maritime Intelligence, Surveillance, and Reconnaissance data collection and dissemination capability.

**Tactical UAS Facility**

President's Budget Request: \$5,500,000

Naval Air Station, Patuxent River

St. Inigoes, MD

This project will construct an Unmanned Aerial System (UAS) Training Facility that will house the Army National Guard at Webster Field. This is a good use of taxpayer money because this facility will host a Guard Unit that currently houses their equipment, trains, and operates in leased space. This will enable them to have a permanent and secure facility so they may continue their homeland security mission.
