

Congress of the United States
House of Representatives
Washington, DC 20515-6502

Dear Chairman Cole and Ranking Member DeLauro:

I am requesting funding for Anchor Point Booster Station Wellhouse Design and Construction in Fiscal Year 2026. The entity to receive funding for this project is the Town of Indian Head, located at 4195 Indian Head Hwy, Indian Head, MD 20640. The funding would be used for The town would design, permit and construct a new water pumping station and wellhouse to replace a failing well. The project is an appropriate use of taxpayer funds because The taxpayers will benefit from the completion of this project because they will receive a new sustainable and reliable water source with the Anchor Point well. In addition to a sustainable source, pressure issues within the Anchor Point Development will be addressed through the construction of the booster station. Having consistent pressure will ensure adequate usage flow to the upper levels of the condominium, as well as maintaining adequate pressures for fire flows in case of an emergency.

The project has a federal nexus because the funding provided is for purposes authorized by Clean Water Act, 33 U.S.C. 1383(c) (Section 603(c) of the Clean Water Act).

I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

Sincerely,

A handwritten signature in black ink, appearing to read "Steny Hoyer", with a stylized, cursive script.

STENY H. HOYER
